PRESENTATION

In this book, you can find basic topics about English language as reading, writing, listening, and speaking of the children who exercise this didactic material. Implementing HELP will lead you on an educational adventure in a different way. Here you are going to find educational activities proposed for children in the third grade of primary school, children ranging from 7 to 8 years old, little giants who need to develop dexterity, practice, self-confidence, love of the English language, and consolidation of their basic knowledge; in this way to acquire meaningful and autonomous learning.

The objective of this notebook is to provide peace of mind to children when learning a new language, consolidating the communicative and expressive techniques of the students through competent activities that will allow good performance in learning. This primer suggests strategies that will allow curiosity, creativity, the use of games, and other techniques, creating a direct link with the English language. Here we present the topics and playful exercises.

**Welcome to our
adventure**
